

Magnetic Bottle Mount - Fidlock Twist

SKU

3010004316

The Twist we needed.

Bottle cages are obsolete because of the TWIST bike base. The cageless magnetic technology makes it possible to mount a bottle on even the smallest bike frames. Its tiny and flat shape also makes it fit in nicely with the bike frame without drawing attention to itself.

The magnetic bottle mount is easily attached with two screws to all regular bike mounting threads:

- Fits all standard bottle cage thread inserts

- Weights only 16 g

- Fits all TWIST modules

Technical Details:

Width: 6.08mm

Height: 106mm

Length: 24.8mm

Material: PA66GF, neodymium, epoxy

Product number: 09603
